

# JD Summit Holdings, Inc.

## Protects its Diversified Group Against Cyber Threats

### Goals

- Cost-effectively provide protection to it's employees, applications within it corporate IT network and beyond the corporate firewall
- Facilitate governance and regulatory compliance to reduce business risk

**JG SUMMIT  
HOLDINGS, INC.**

**JG Summit Holdings, Philippines**

**Industry:** Conglomerate

**Services:** provides its various companies services such as reducing risk, centralized corporate control and a flexible structure for growth

**Employees:** 26,100+ Employees

**Solution:** Qualys VMDR

### SUCCESS FACTORS

**Rapidly detected and remediated vulnerabilities across 2,500 mission-critical endpoints**

**Cut testing cycles** for new online banking web apps from weeks to days

**Reduced business risk** due to robust to comprehensive governance processes

**Accurate insights** into vulnerabilities across our critical systems

**Faster and better-informed decisions** on our defensive posture

Leveraging the same data we've collected for VMDR, we can monitor the status of each of our assets and show the owners exactly what they need to do to stay in compliance.

**Gonz Gonzales**

Chief Information Security Officer, JG Summit Holdings, Inc.

### Why Qualys?

- Accurate detection and remediation of vulnerabilities across the entire group from a single, central point.
- Timely and accurate vulnerability insights to system owners, helping to accelerate high-priority remediation activities.
- Comprehensive governance and regulatory compliance
- Robust product roadmap and responsive customer support
